

TCA LIFTING
Specialist Cranes & Access

reaching new heights

Unrivalled service from the UK's leading
supplier of specialist cranes and access

FINDING OUR CLIENTS THE SAFEST, MOST RELIABLE, COST EFFECTIVE SOLUTIONS

INDUSTRIES WE SUPPLY

- Construction
- Facilities Management
- Arboriculture
- Glazing
- Curtain Walling
- Fit-Out
- Photography & Filming
- Surveying
- Telecommunications
- Archaeology
- Aviation
- Utilities
- Heritage
- and many more...

TCA Lifting is a leading supplier of specialist access and cranes for rent or sale. Our wide range of spider lifts and compact cranes prove most useful when conventional access platforms or cranes are just not suitable.

The benefits of these innovative machines have proven invaluable in almost every sector of industry, but popular applications include: Construction (glazing, curtain walling, fit-out etc), FM (maintenance, cleaning, inspections etc), Arboriculture, Film & TV, Architectural surveys and Telecommunications.

TCA Lifting also provides a comprehensive range of support services including: contract lifts, accredited training (IPAF & CPCs), specialist technical and engineering support, and unrivalled collaboration with clients to assist with their site specific access & lifting requirements.

SPIDER ACCESS

Spider Access is an increasingly popular method of working at height, and with working heights from 14 – 52m, wheeled and tracked chassis options and environmentally friendly power options, these compact, low-weight and versatile machines are able to work in a vast range of applications which are often unsuitable for conventional access equipment.

TCA Lifting is one of the UK's largest suppliers of spider access equipment for rent or sale and is the Palazzani dealer for the UK & Ireland. Palazzani is one of the innovators of the spider concept and has built a reputation for high quality, reliable and innovative equipment.

LIFTING CAPACITY

5-70t

MINI CRANES

TCA Lifting has a comprehensive rental fleet of Mini Cranes, including Spider and Pick & Carry Floor Cranes, from world leading manufacturers Maeda, Unic, Jekko and Valla.

These superb cranes combine low ground bearing pressures and compact dimensions with powerful lifting abilities, of up to 10 tonnes and lift heights up to 40m.

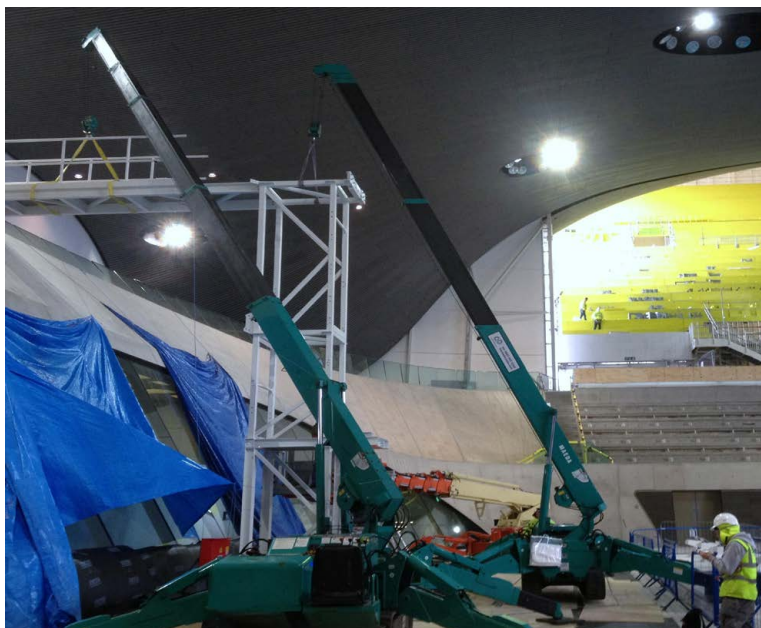

These versatile machines work in areas inaccessible to conventional cranes and provide a cost effective and environmentally friendly lifting solution. They are safe, easy to use machines, providing the perfect solution to many difficult lifting problems. The applications for these machines are virtually limitless but include: Construction, Glazing, House Building and FM.

CRAWLER CRANES

Compact crawler cranes are incredibly versatile machines with lifting capacities from 5 - 70t and lift heights of over 60m.

Their multi-telescopic booms and compact dimensions (with no need for outriggers) make them ideal for projects with limited space, weight restrictions, or time constraints. Their low weight and powerful crawler chassis produce low ground loadings, which is perfect for travelling over soft or rough terrain.

Crawler cranes are ready to work within minutes of delivery to site and their versatility enables them to provide significant lifting operations on all types of projects. Their capabilities are further enhanced by impressive pick & carry capacities and a range of fly-booms and other accessories.

CONTRACT LIFT & CRANE HIRE

TCA Lifting offers its cranes as a standard hire or as a fully planned contract lift, including full site survey, lift plan, insurance risk and RAMS (risk assessment & method statements). We have fully qualified teams to plan and carry out the lift – however complex. Our AP's (appointed persons), crane supervisors, crane operators, slingers and signallers are all experienced and CPCS qualified.

TRAINING

Safety is vital when working at height or using lifting equipment and quality training is an important element in keeping users safe. TCA Lifting have provided high quality training, on a wide range of cranes and access, by experienced instructors for many years.

All TCA Lifting training is provided by CPCS, IPAF and manufacturer approved instructors.

MEWPS -As an accredited IPAF Training Centre, we can train and test on all MEWP categories to operator, demonstrator and instructor level. We offer a range of other IPAF training courses, including harness, MEWPs for Managers, Loading and Unloading.

COMPACT CRANES - TCA Lifting is a manufacturer approved training provider for Maeda and Jekko, and also offers CPCS training for all types of compact crane.

TCA LIFTING ... THE UK'S LARGEST FLEET OF SPECIALIST CRANES AND ACCESS

EQUIPMENT SALES

TCA Lifting offers sales of new and used equipment of all types of access platforms and compact cranes from leading manufactures such as, ATN, Genie, Jekko, JLG, Maeda, Niftylift, Palazzani, Skyjack, Unic and Valla.

We work with architects during a buildings design stage to provide free technical support (e.g. CAD drawings and detailed technical information), and recommendations for the most suitable access & lifting equipment to clean and maintain their building once constructed. We have successfully sold equipment to some of the UK's most iconic and prestigious buildings such as Heathrow Terminal 5, Hampton Court Palace, The Royal Opera House, and Kew Gardens.

TCA Lifting sells equipment worldwide and has successfully provided consultancy and machine sales throughout Europe, China, India, Middle East, and the USA. Please contact us for further details.

SERVICE & SUPPORT

TCA Lifting provides a full range of support services including comprehensive service, spare parts and product support for all types of powered access platforms (MEWPs) and compact cranes. Our engineers are 'time served' with many years of practical experience on a wide range of cranes & access equipment.

All TCA Lifting engineers regularly receive technical product training and are independently accredited to ensure that equipment is maintained to the highest standard. We are able to provide full maintenance packages, service support and LOLER inspections on all types of MEWP's and compact cranes.
